Horizon Europe: Connecting for Success across the R&I Ecosystem

An Imperial Research Office Event

Agenda

930AM Welcome and introductions

945 "Myth Busting and Upskilling"!

1015 Horizon Europe Funding landscape in

2024/2025

1045 Coffee break

How to Connect for Success at the

European Level through Crowdhelix

1145 Having an Impact: From idea to competitive

proposal

1215PM Connectors Lunch

Who we are: The Research Office

UK and Horizon Europe

€95.5 billion (or £82 Bn) between 2021 and 2027

UK will contribute average €2.6 billion per year

UK historically one of the best performers

Successful UK applicants to the collaborative opportunities receive average £450,000 per project

Provides UK researchers with a stable basis for international collaboration

UK able to fully participate in the Horizon Europe programme, including leading projects

Supports international collaborations to address global challenges in areas including

- net zero
- energy
- health
- agriculture
- digital technologies
- space and transport

Imperial's European Research and Innovation Funding Story

652.1M€ in grant funding since Framework
Programme 4 (1990s+++)

> 1300 PROJECTS

8th ranked Higher Education Institute for Horizon 2020

> 320M€ grant funding

> 550 PROJECTS

> 160 European Research Council (ERC) grant holders

erc

> 170 Marie Sklodowska Curie Action (MSCA) post-doctoral fellows supported

> 120 international research collaborations across Global Challenges

Imperial's Horizon Europe Story, so far

- > 204 grants (underwrite funding)
 - > 115M€ grant funding value
- > 30 ERC successes (underwrite)
- > 60 MSCA postdoc fellowship successes (underwrite)
- > 60 international research collaborations across Global Challenges

Imperial College London

Enterprise

Research Impact Management Office

Public Outreach Project Impact

Imperial Enterprise delivered a week-long exhibition at the Royal Society Summer of Science Exhibition for Imperial-led project, SONICOM (Dyson School of Engineering).

The team facilitated thousands of connections between the project researchers and the public incl. young scientists, parents, & cochlear impact users. The success of this public outreach included an invite to the Royal Society's Policy event with UK MoP and funding sponsors.

Today's Agenda

9:00 - 9:30	Registration and Coffee
9:30 - 9:45 9:45 - 10:45	Welcome from the Research Office: Meet your Imperial EU Team and Horizon Europe support at Imperial, including the Research Impact Management Office
10:45 - 11:10	Session 1: Horizon Europe Myth Busting and Upskilling - Presented by Michael Browne Session 2: Horizon Europe Funding Ladscape in 2024;2025: Where is the EC spending € in 2024/2025, how much is available. Targeted opportunities and schemes/themes for collaboration - Presented by Michael Browne
11:10 - 11:45	Coffee Break
11:45 - 12:15	Session 3: How to Connect for Success at the European Level through Crowdhelix: How to get noticed, how to get involved, how to lead and strategies for your first steps
12:15 - 13:00	Session 4: Having an Impact - How to address Impact in a successful proposal (Pathways to Impact and measures to accelerate impact) under Horizon Europe
	Please join us for the Connectors Lunch

Welcome to Session 1 | Horizon Europe Myth Busting and Upskilling

Presented by Michael Browne

Today's Speakers from Crowdhelix

Am I Eligible?

UK joins Horizon Europe under a new bespoke deal

"Since 7 September 2023 UK researchers can apply for grants and bid to take part in projects under the Horizon programme, with certainty that the UK will be participating as a fully associated member for the remaining life of the programme to 2027 ..."

Gov.uk

How does Horizon Europe Differ from other Funding Schemes?

Horizon Europe is more than an international R&I funding scheme. It is Global.

The decision to join, participate in or associate and pay in to Horizon Europe is made by national governments. EU member states are automatically qualified to participate in and receive funding from Horizon Europe.

Horizon Europe stands out because it is a Global Competition, lending an added element of scale and prestige to and for those participating and succeeding

The UK was once the leading recipient of EU funding. Post Brexit, the UK is now a newly associated country to Horizon Europe. It could take time but we have the facilities, infrastructure and talent to re take the top spot

Horizon Europe, compared to other schemes (including its predecessor Horizon 2020) has a greater focus on Societal Impact. What is done with the (Key Exploitable) Results of the projects they award as they near their completion. How they make it to market, generate IP, entice investment, and stakeholder engagement.

Crafting a compelling Impact section (Section 2.2 - Measures to Accelerate Impact) can often be a make or break moment for many proposals during the evaluation phase

Where do I start when considering Horizon Europe?

IMPERIAL

- The best place to start is often your University's Research Support Office Imperial College London has an excellent EU Team led by Andrea Bell
- They can provide you with advice on EU funding opportunities and pre-contractual aspects of EU funding

EU Team Contacts

Andrea Bell - Head of EU Team, Primary contact for Faculty of Medicine, acting cover Engineering Tel. +44 (0)20 7594 6580

James Lloyd - Primary Contact for Faculty of Natural Sciences Tel. +44 (0)20 7594 3635

Megan Coombs - Primary Contact for Business School Tel. +44 (0)20 7594 6578

Am I Horizon Europe Ready?

What is Horizon Europe?

Horizon Europe: The Facts

You likely already know that Horizon Europe is the EU's key funding programme for research and innovation with a budget of €95.5 billion. It tackles climate change, helps to achieve the UN's Sustainable Development Goals and boosts the EU's competitiveness and growth. There is roughly €16 billion available from Horizon Europe between 2024 - 2025

Horizon Europe is built around three main pillars

- -Excellent Science (Pillar 1)
- -Global Challenges and European Industrial Competitiveness (Pillar 2) Innovative Europe (Pillar 3).

Cutting across all these three pillars is a **widening initiative** that builds capacity in developing countries.

*All of this is underpinned by well thought out international collaboration with a network of trusted partners - **This is essential for success**

Session One: Overview

Horizon Europe: Myth Busting and Upskilling

In session one we will examine some of the anxieties that researchers often face when deciding whether or not to apply for European funding for the very first time.

Do or Do Not: What are the pros and cons associated with Horizon Europe applications?

Telling Fact From Fiction: What are the rumours circulating regarding the challenges associated with these applications and are they warranted?

Upskilling: What do researchers need to know and how can they begin the process with the confidence, tools and general advantages needed to connect, collaborate and produce a high level, robust and ultimately winning proposal in the eyes of European Commission evaluators?

Do I need to write the topic to be successful?

The short answer is no... You do not need to be a senior professor or PI authoring the topic in order to succeed under Horizon Europe

Collaboration is the name of the game and collaborators of all post-graduate levels participate in successfully funded grants

Many grants are designed with talent acceleration in mind. For example, the MSCA (Marie Sklodowska-Curie Actions) under Horizon Europe

While some collaborators under Horizon Europe commit to coordinating grants or leading entire work packages

Others may be responsible for delivering specific tasks within a section of a work programme that is **attributed to their research**, **assets**, **strengths and talents within their thematic area of interest**

Key exploitable results (KERs) and new technologies of all TRL levels (1-9) are exploitable across the entire proposal and project value chain

Therefore, it helps to **be mindful of and engage with the many tools at your disposal**, such as existing networks, (colleagues, mentors, past collaborators) new and emerging networks, (associated and widening regions to HE) research support offices, NCPs, Imperial College's account manager at Crowdhelix

Real Life Examples of UK Success Under Horizon Europe

"Many thanks to Crowdhelix for helping us secure a newly funded large scale Horizon Europe project in the area of green and digital transformation of the refractory recycling value chain."

> Edwin Ntainjua Bid Manager

"From my experience, Crowdhelix has worked very well for the University of Leeds' collaboration needs. We posted on their platform, on behalf of a Leeds based PI, about collaboration on a recent Horizon Europe submission. We were able to connect with strong consortium partners with whom to develop this proposal in time for the deadline. Crowdhelix also contributed to the development of the Impact section through the inclusion of their Helix Impact Model."

WIDENING PARTICIPATION AND SPREADING EXCELLENCE

REFORMING AND ENHANCING THE EUROPEAN R&I SYSTEM

What are the key steps and best practices?

IDEA

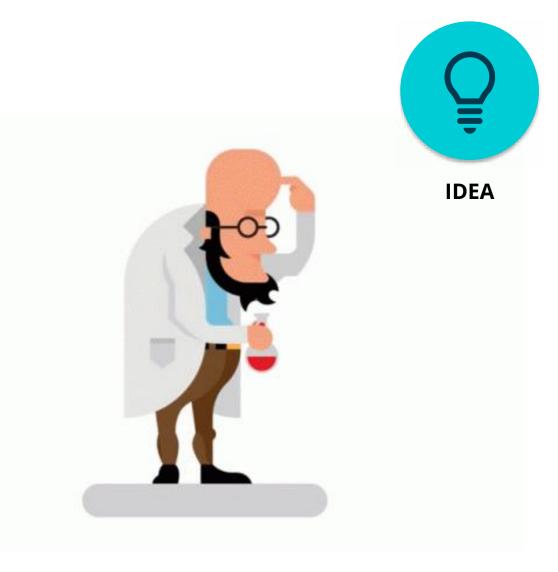

Funding opportunity

Strong partnership

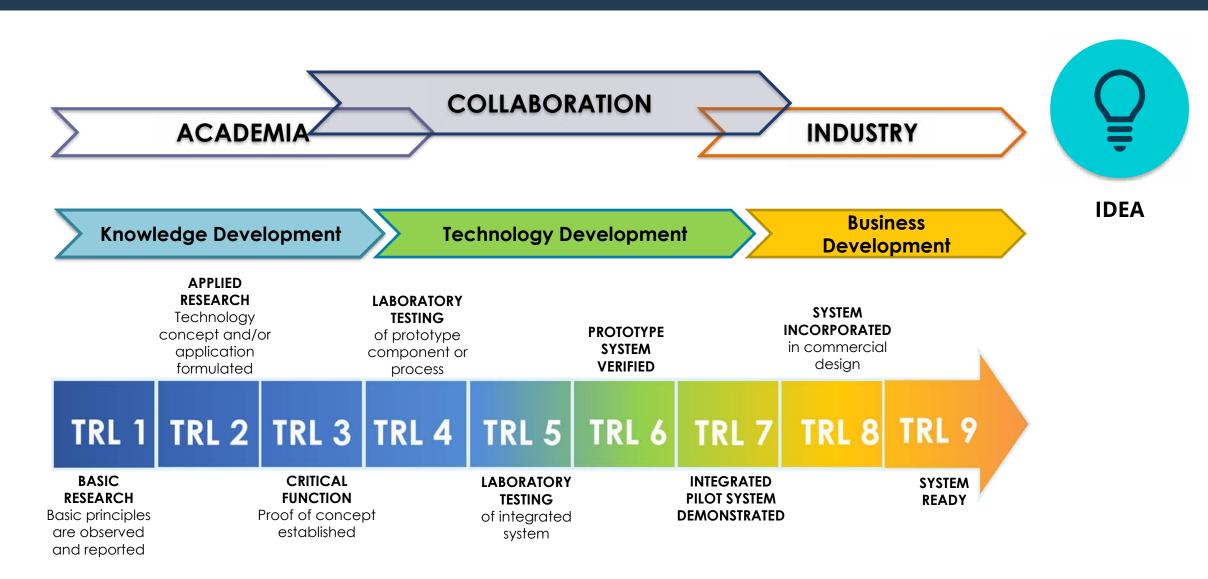

Define your project goals and objectives

- What problem does your research aim to address?
- Why do you want to do it?
- What do you propose to do?
- **How** will you do it?
- What innovative ideas or technologies will you be developing?
- Why you?

Technology Readiness Levels

Type of actions

- RIA Research and Innovation Action: Leads to new knowledge, new or improved technology
- IA Innovation Actions: Focuses on closer to market activities: prototyping, scaling-up, to produce new or improved products or services.

Ideal for ideas that could generate spin-off company.

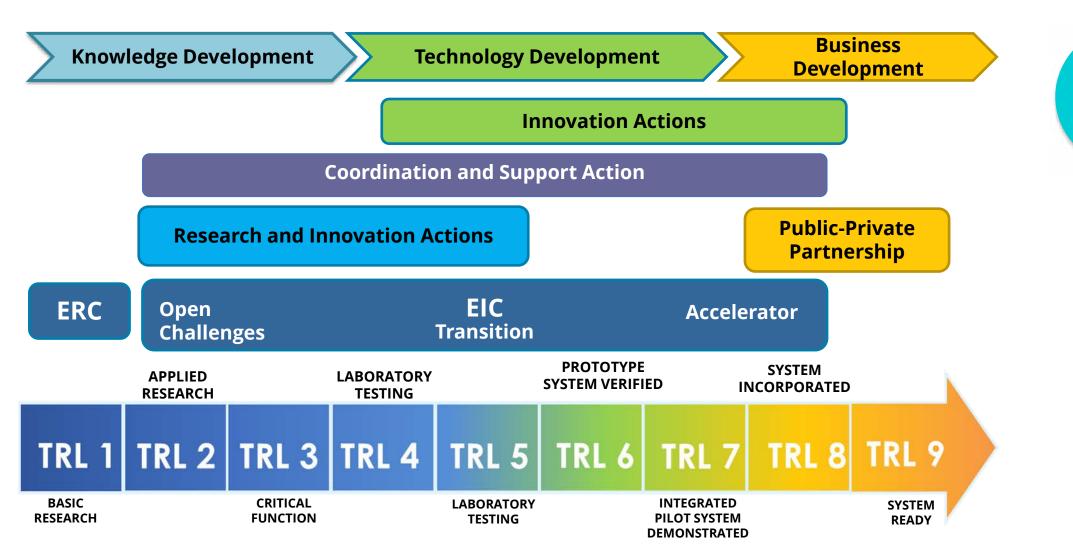

- CSA Coordination and Support Action: Coordination and networking of research and innovation project, programmes and policies
- standardisation, dissemination, communication, policy dialogues
- PPP Public Private Partnership: Links Europe's industry (both large and small) with researchers, academia + EC to cooperate in data research and innovation

Technology Readiness Levels

IDEA

The European Innovation Council

The EIC is Europe's flagship innovation programme to identify, develop and scale up breakthrough technologies and game changing innovations

The European Innovation Council

The European Innovation Council (EIC) has been established under the Pillar III - Innovative Europe of the EU <u>Horizon Europe</u> programme

HORIZON EUROPE EURATOM SPECIFIC SPECIFIC PROGRAMME IMPLEMENTING HORIZON EUROPE & EIT PROGRAMME: Exclusive focus on civil applications **EUROPEAN** Pillar I Pillar II Pillar III DEFENCE Fusion **EXCELLENT SCIENCE GLOBAL CHALLENGES &** INNOVATIVE EUROPE FUND **EUROPEAN INDUSTRIAL** Exclusive focus on COMPETITIVENESS defence research European Research Council Health European Innovation & development · Culture, Creativity & Council Inclusive Society Marie Skłodowska-Curie Civil Security for Society European Innovation · Digital, Industry & Space Fission Ecosystems Research Research Infrastructures · Climate, Energy & Mobility actions · Food, Bioeconomy, Natural European Institute of Resources, Agriculture & Innovation & Technology* Environment Joint Research Centre Joint Development Research actions Center WIDENING PARTICIPATION AND STRENGTHENING THE EUROPEAN RESEARCH AREA Widening participation & spreading excellence Reforming & Enhancing the European R&I system

EIC budget (for the period 2021-2027)

EIC funding schemes

The EIC Pathfinder

for advanced research to develop the scientific basis to underpin breakthrough technologies

The EIC Transition

to validate technologies and develop business plans for specific applications

The EIC support technologies and innovations in any field without any predefined priority areas (open calls). For the Pathfinder and Accelerator, a complementary set of "Challenges" targets specific technologies and innovations of strategic interest for the EU.

EIC Pathfinder: high-risk/high-gain science-towards-technology breakthrough interdisciplinary research

Who can apply

Open call: only consortia can apply.
Challenges call: smaller consortia (at least two eligible entities) or and single applicants as well as larger consortia.

Budget and objectives

Open Call: Grants up to **EUR 3 million**Challenge Call: Grants up to **EUR 4 million**.

(starting from early TRLs aiming at achieving TRL3 or 4)

Indicative Budget: €136 M

Deadline: 7 March 2024

EIC Challenge: top-down challenge-driven calls for tackling specific technology and breakthroughs

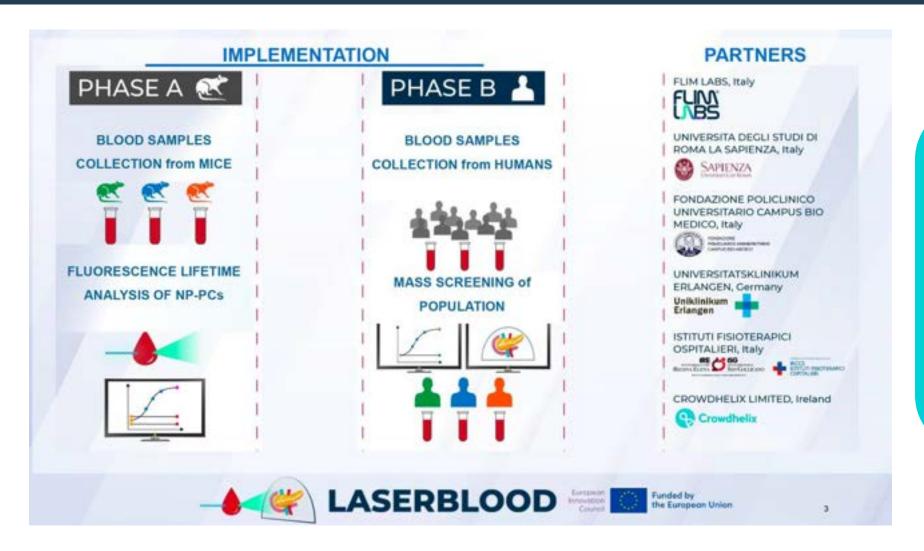

- "Solar-to-X" devices
- Towards cement and concrete as a carbon sink
- Nature inspired alternatives for food packaging and films
 Nanoelectronics for energy-efficient smart edge devices
- Protecting EU space infrastructure

Indicative Budget: €120 M

Deadline: 16 October 2024

The EIC Pathfinder LASERBLOOD Project

Laserblood is based on a biophotonic technology that can be used to predict the development of pancreatic cancer in certain categories of people at risk (e.g. diabetics, obese people, patients with certain cystic diseases of the pancreas, etc.) and at the same time offer the possibility of verifying the real effectiveness of the treatments that affected patients undergo.

EIC Transition: supports any suitable scenario that jointly advances technological and market aspects

Who can apply

Single applicants (SMEs, spin-offs, start-ups, research organisations, universities) or small consortia (minimum 2, maximum 5 eligible)

Budget and objectives

Grants of up to EUR 2.5 million to validate and demonstrate technology in application-relevant environment (starting at TRL 3/ 4 aiming at achieving TRL 5/ 6) and develop business and market readiness.

Indicative Budget: €94 M Deadline: 18 Sept 2024

No challenges

EIC Transition: supports any suitable scenario that jointly advances technological and market aspects

Who can apply

Single applicants (SMEs, spin-offs, start-ups, research organisations, universities) or small consortia (minimum 2, maximum 5 eligible)

Budget and objectives

Grants of up to EUR 2.5 million to validate and demonstrate technology in application-relevant environment (starting at TRL 3/ 4 aiming at achieving TRL 5/ 6) and develop business and market readiness.

Indicative Budget: €94 M Deadline: 18 Sept 2024

No challenges

End of Session 1

Questions

Welcome to Session 2

Horizon Europe Funding Ladscape in 2024 - 2025: Where is the EC spending € in 2024/2025, how much is available? Targeted opportunities and schemes/themes for collaboration

Planning for the Future

Important Questions to Consider

- -What to consider strategically regarding the EU & EC political context?
- -Will Horizon Europe's "Missions" continue to be relevant and are they on track to achieve their stated goals?
- -How do we recommend researchers and their institutions prepare for the rest of Horizon Europe and FP10?
- -How much funding is left in Horizon Europe and how much will be allocated in FP10?
- -How do I gather intelligence on what will be funded beyond the coming/known open calls and deadlines? **More work programmes are expected in Q1 or Q2 of 2025...**
- -Remember, your research support office and NCP are your first port of call they may be able to provide you with key intel, including published/leaked draft work programmes for the coming year(s)
- **Make sure you make the effort to build a rapport with consortium partners**. The "Human Element" is also significant when putting together an achievable goal. They will remain trusted collaborators within your network for future endeavours!
- -Also, consider attending Horizon Europe info days focused on your thematic areas or clusters. You can also post your intentions to apply for future funding objectives on Crowdhelix and liaise with your account manager there for guidance

Session 2

Process for applying for for collaborative research and innovation project

Selecting the most suitable Horizon Europe call

What do they want?

- Read Work Programme
- Careful Call Analysis

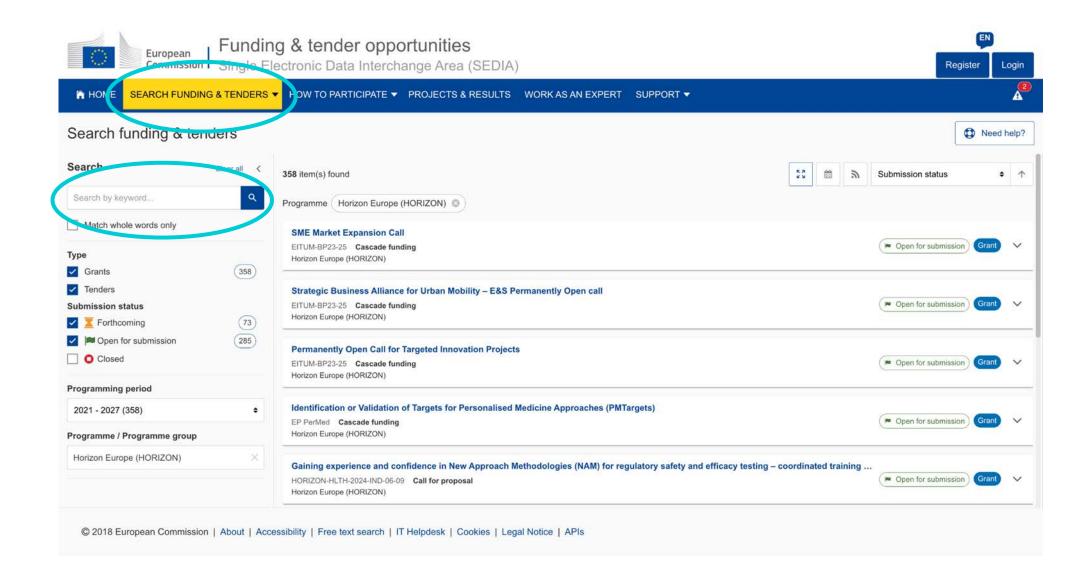

What do you want?

What is the problem?
Why do you want to do it?
What do you propose to do?
How will you do it?

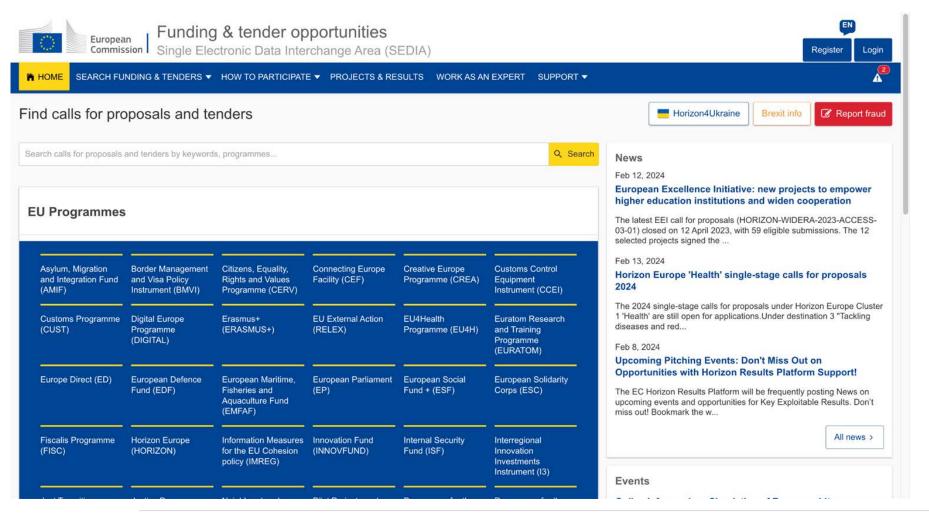

Funding & Tender portal

	HORIZON-MISS-2024- CLIMA-01-07	Demonstration of solutions specifically suited to rural areas and small/ medium size population local communities	IA	18/09/202 4	€22,500, 000	€7,500,00 0
4	HORIZON-MISS-2024- CLIMA-01-08	Demonstration of approaches by regions and local authorities focused on increasing climate resilience of the most vulnerable social groups (just climate resilience)	IA	18/09/202	€22,500, 000	€7,500,00 0
4	HORIZON-MISS-2024- CLIMA-01-09	Systemic and cross-sectoral solutions for climate resilience, tailored to the local needs of regions and local authorities.	IA	18/09/202 4	€27,000, 000	€9,000,00 0

Collaboration Communities in Your Research Areas

Mission Cancer

Multi-disciplinary and cross-sectoral research & innovation to combat cancer and its comorbidities

Health

Personalised care & healthy ageing. Disease prevention, detection, treatment & management

Materials

Nanotechnologies, advanced materials (including graphene) & biotechnologies

Trustworthy AI

Mitigating diversity biases of Artificial Intelligence in the labour market

Healthy Cities

Visionary nature based solutions for human centered cities. Sustainable transition to smart & future cities

Mission Climate

Sustainable & interdisciplinary climate solutions & policies

Quantum

Quantum technologies including computing, communications, metrology, and cryptography

Digital

Information and Communications Technology Components & Systems

PROJECT PROPOSALS

What to look for in the Horizon Europe call text?

Looking for CLUES

Verbs - indicating expected actions in the project (*set-up, develop, validate*) indicating quantitative measures (*reduce, increase*) determining the expectations (*shall, should, is encouraged*)

all the following expected outcomes
most of the following research activities

Indications on target groups

Legislative or scientific context

Suggestions on collaborations and synergies

"The involvement of is encouraged" or "synergies should be sought with...."

How to proceed with the Horizon Europe call?

- Reading the call carefully
- Highlighting important elements and keywords in the text
- Dividing the text of the topic into sentences, and reflecting on each of them individually
- Creating tables or competence maps
- Sharing the analysis of the call text with the project partners

Building a Strong Consortium

Strategy to find the best partners

Should be composed of a diverse group of partners:

Scientists

Individual Academics

Industry Partners

Universities

Research Organisations

SMEs

Patients Groups

Strategy to find the best partners

The direct approach

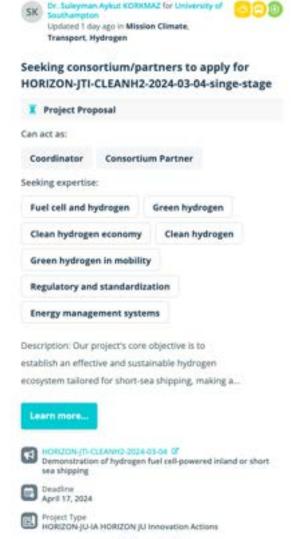

- Your network
- Previous collaboration
- Scientific Papers
- Conferences, Seminars
- Information Days

Visibility approach

- Matching platforms Such as Crowdhelix
- Social networks Your colleagues or supervisor
- specific HE calls, opportunities to collaborate, and networking. These often include parallel breakout sessions for specific calls/tenders between researchers interested in collaborating)
- FT Portal

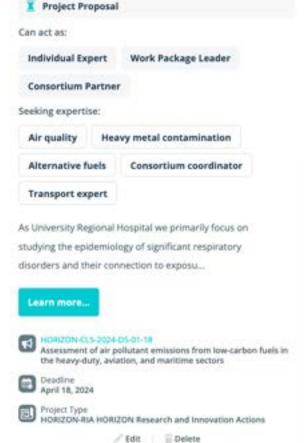

Crowdhelix opportunities

Seeking international collaborators for upcoming Call HORIZON-CL5-2024-D5-01-18

KPMG Portugal

Crowdhelix secures Horizon Europe win for KPMG

August 2023

"The award of a Horizon Europe project is a great accomplishment for KPMG Portugal. Our participation will underline what we do best: bridge the gap between science. innovation & business. Our participation was only possible due to the great matchmaking work behind the scenes by Crowdhelix staff members, facilitated by their platform & Climate Helix community. We trust that this project is the first of many successful collaborations that will come into fruition via Crowdhelix. We will undoubtedly continue profiling KPMG as a member and seeking to find the best partners for the best projects."

> Paula de Pinho Associate Partner, R&D&l Grants & Incentives

Digiotouch OU

Crowdhelix plays instrumental role connecting SME to funding

September 2023

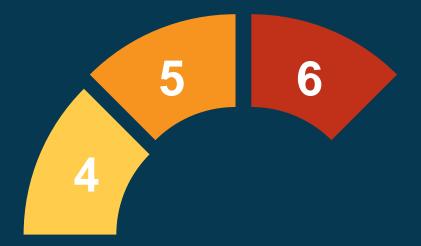

"Crowdhelia has been instrumental in forging successful R&D: collaborations for my company Digiotouch. Special thanks to Crowdhelix for facilitating the connection between Digiotouch and NTNU who invited us to join a consortium, resulting in the funded BIAS project under the Horizon. Europe call HORIZON-CL4-2021-HUMAN-01-24."

> Soumya Kanti Datta Founder, CEO

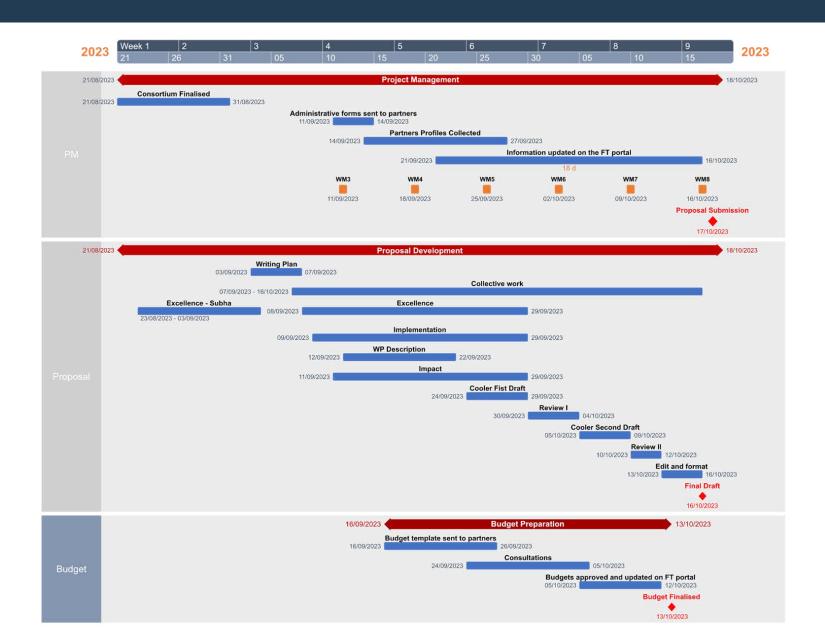

START EARLY....

Plan the development of your proposal

Writing the proposal

- Read the Guide for Applicants watch out for details
- Get the proposal template.
 Make sure it's the current one (download one from the FT portal)
- Divide instructions into headings

Excellence

The following aspects will be taken into account only to the extent that the proposed work is within the scope of the work programme topic.

Objectives and ambition [e.g. 4 pages]

- Briefly describe the objectives of your proposed work. Why are they pertinent to the work programme topic? Are they measurable and verifiable? Are they realistically achievable?
- Describe how your project goes beyond the state of the art, and the extent the proposed work is ambitious. Indicate any exceptional ground-breaking R&I, novel concepts and approaches, new products, services or business and organisational models. Where relevant, illustrate the advance by referring to products and services already available on the market. Refer to any patent or publication search carried out.
- Describe where the proposed work is positioned in terms of R&I maturity (i.e. where it is situated in the spectrum from 'idea to application', or from 'lab to market'). Where applicable, provide an indication of the Technology Readiness Level, if possible distinguishing the start and by the end of the project.
 - Please bear in mind that advances beyond the state of the art must be interpreted in the light of the positioning of the project. Expectations will not be the same for RIAs at lower TRL, compared with Innovation Actions at high TRLs.

1.2 Methodology [e.g. 15 pages]

- Describe and explain the overall methodology, including the concepts, models and assumptions that
 underpin your work. Explain how this will enable you to deliver your project's objectives. Refer to any
 important challenges you may have identified in the chosen methodology and how you intend to
 overcome them. [e.g. 10 pages]
 - This section should be presented as a narrative. The detailed tasks and work packages are described below under 'implementation'.
 - 4. Where relevant, include how the project methodology complies with the 'do no significant harm' principle as per Article 17 of <u>Regulation (EU) No 2020/852</u> on the establishment of a framework to facilitate sustainable investment (i.e. the so-called 'EU Taxonomy Regulation'). This means that the methodology is designed in a way it is not significantly harming any of the six environmental objectives of the EU Taxonomy Regulation.
- Describe any national or international research and innovation activities whose results will feed into the project, and how that link will be established; [e.g. 1 pages]

Writing Plan

- Write collaboratively (if you can)
- Prepare the Writing Plan
- Assign writing responsibilities to team/consortium members
- But remember that someone needs to be in charge!
- Keep the deadlines

Section	Pages Max 45 pages	Responsible	Deadline
1. Excellence			
1.1 Objectives & Ambition Briefly describe the objectives of your proposed work. Why are they pertinent to the work programme topic? Are they measurable and verifiable? Are they realistically achievable? Describe how your project goes beyond the state-of-the-art Describe where the proposed work is positioned in terms of R&I maturity	4 pages

		0	7

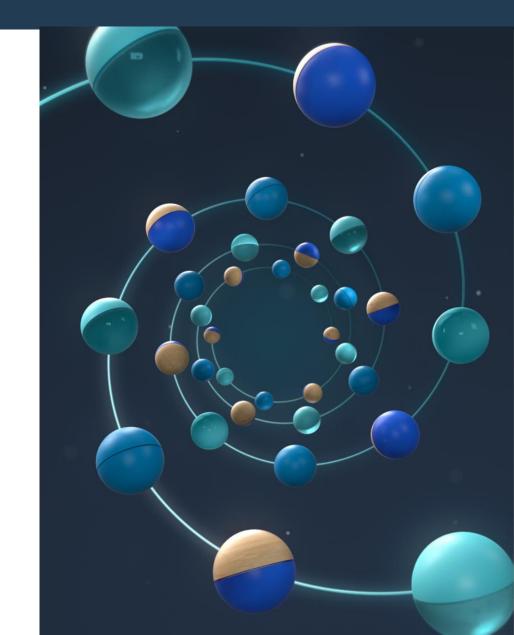

Top Tips

- Grab the reviewers attention early on....
- Abstract

Importance of the First Page

- What specific problem are you trying to solve?
- Is it a European priority? Could it be solved at National Level?
- Is the solution already available (product, service, transfer)?
- Why now? (What would happen if we did not do this now?)
- Why you? (Are you the best people to do this work?)

Final Advice

If you don't succeed at first...

...resubmit!

Learn from Feedback

Persistence is key

Review and polish

Think as a reviewer:

Use self-evaluation form

- Seek external reviews
 - Colleagues
 - Consultant
 - Talk to NCPs
 - Talk to us!

1. Excellence

The following aspects will be taken into account, to the extent that the proposed work corresponds to the description in the work programme:

- Clarity and pertinence of the project's objectives, and the extent to which the proposed work is ambitious, and goes beyond the state of the art.
- Soundness of the proposed methodology, including the underlying concepts, models, assumptions, inter-disciplinary approaches, appropriate consideration of the gender dimension in research and innovation content, and the quality of open science practices, including sharing and management of research outputs and angagement of citizens, civil society and end users where appropriate.

	m		

Score 1 (0-5):

Threshold: 3/5

2. Impact

The following aspects will be taken into account, to the extent that the proposed work corresponds to the description in the work programme:

- Credibility of the pathways to achieve the expected outcomes and impacts specified in the work programme, and the likely scale and significance of the contributions from to the project.
- Suitability and quality of the measures to maximise expected outcomes and impacts, as set out in the dissemination and exploitation plan, including communication activities.

3. Quality and efficiency of the implementation

The following aspects will be taken into account, to the extent that the proposed work corresponds to the description in the work programme:

- Quality and effectiveness of the work plan, assessment of risks, and appropriateness of the effort assigned to work packages, and the resources overall.
- Capacity and role of each participant, and the extent to which the consortium as a whole brings together the necessary expertise.

End of Session 2 and Coffee Break

Thank you for your attention!

Session 2 has now concluded

We will have a coffee break and begin Session 3 at 11:10am

Session 4 | Making an Impact Presented by Michael Browne

How to address Impact (Pathways to Impact and measures to accelerate impact) under Horizon Europe

Session 4 | Making an Impact Presented by Michael Browne

How to address Impact (Pathways to Impact and measures to accelerate impact) under Horizon Europe

Overview

Horizon Europe: Destinations

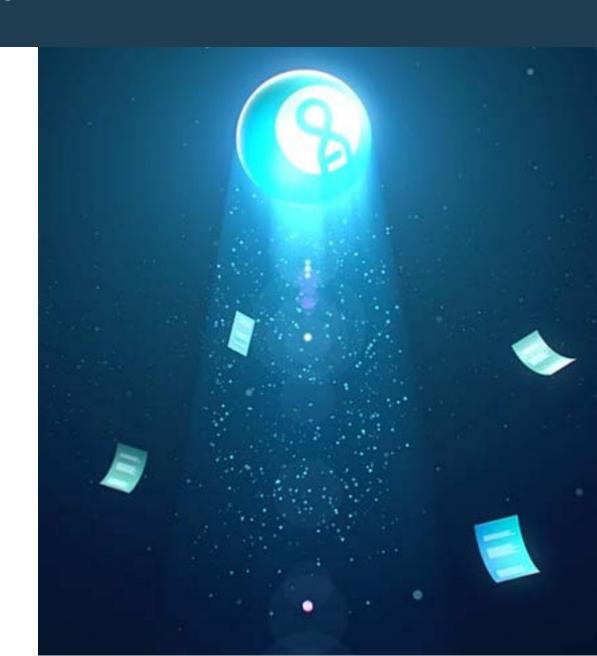

Key Impact Pathways

Writing your impact section:

- Section 2.1: Project pathways towards impact
- Section 2.2: Measures to maximise impact

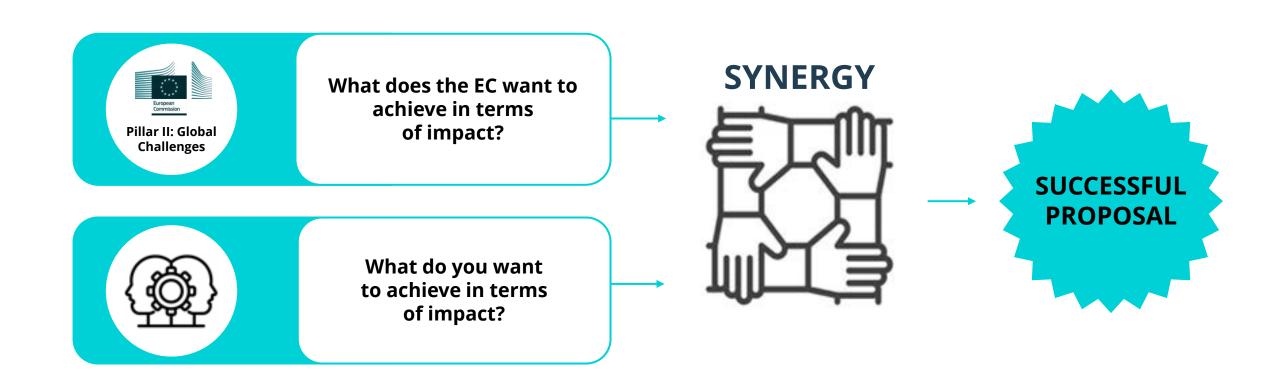

Evaluating your proposal

Crowdhelix – Impact partner

Impact: requires synergy and alignment with the EC

Your project has to serve the needs of the EC in terms of **policy and objectives**Your project has to be aligned with the requirements of the **Topic/WP/Destinations**

Horizon Europe: Destinations

Key Strategic

Orientations

Wider effects:

- · Social
- Economic
- Scientific

Destination Definition:

Packages of actions around which each Work Programme will be designed, aimed at contributing to the objectives and expected impacts set out in the strategic plan.

The destination will provide the policy narrative for the calls and actions included in the Work Programme *Source:* https://www.horizoneuropencpportal.eu/sites

3 - 4 cross

cutting

impact areas

Strategic Plan

Linking policy priorities to your projects outputs

HORIZON EUROPE IMPACT IMPLEMENTATION **EC POLICY PRIORITIES** Political Guidelines for the European Commission 2019-2024 (and other General Policy Level key strategic documents - e.g. Green Deal) KEY STRATEGIC Set of strategic objectives within the EC policy priorities where R&I Programme Level ORIENTATIONS FOR R&I investments are expected to make a difference IMPACT AREAS Group of expected impacts highlighting the most important transformation Cluster Level to be fostered through R&I EXPECTED IMPACTS Wider effects on society (incl. the environment), the economy and science WP Level For success, your ⇒ DESTINATIONS enabled by the outcomes of R&I investments (long term) Strategic Plan & Work Programme: R&/ projects General objectives contribution to assembles, ament, inclusive by 15% and passenger average throughput by and applicable mobility services. 10%, leading to a 28% reduction in infrastructure outputs <u>must</u> be EXPECTED OUTCOMES Effects of Horizon Europe projects such as uptake, diffusion, use and perfectly aligned with =>TOPICS deployment of the projects' results by direct target groups (medium term) the outcomes Work Programme: Iresovative = Specific objectives Project: At least 9 European airports adopt the accessibility and logistics solutions advanced forecasting system that was applied by the European Transport sector demonstrated during the project and expected impact, of the call PROJECT RESULTS What is produced during the project implementation, such as innovative solutions, algorithms, new business models, guidelines, policy Operational objectives recommendations, methodologies, publications, database, prototypes, trained researchers, new infrastructures, proof of feasibility, networks, etc. (short term) Project (by the end of its implementation): Successful large-scale demonstration trial with 3 European airports of an advanced forecasting system for proactive airport passanger flow management

Familiarise yourself with Horizon Europe Strategic Plan 2021-2024, understand the work programme, analyse the call documents and make the connection with all of them in your proposal!!!!

HEU defines three types of impact based on the EC objectives, tracked with 9 key impact pathways

OPERATIONAL OBJECTIVES . Creating high-quality new knowledge Scientific 2. Strengthening human capital in R&I **Impact** 3. Fostering diffusion of knowledge and Open Science 4. Addressing EU policy priorities & global challenges through R&I Societal 5. Delivering benefits & impact via R&I missions Impact 6. Strengthening the uptake of R&I in society 7. Generating innovation-based growth 8. Creating more and better jobs 9. Leveraging investments in R&I

SPECIFIC OBJECTIVES

Create & diffuse high quality new knowledge, skills, technologies and solutions to global challenges

Strengthen the impact of R&I in developing, supporting and implementing EU policies, and the uptake of innovative solutions in industry & society to address global challenges

Foster all forms of innovation, including breakthrough innovation and strengthen market deployment of innovative solutions

Example of Key Impact Pathway indicators

Short-term
Project results

Medium-term
Expected outcomes

Longer term
Expected impacts

publications

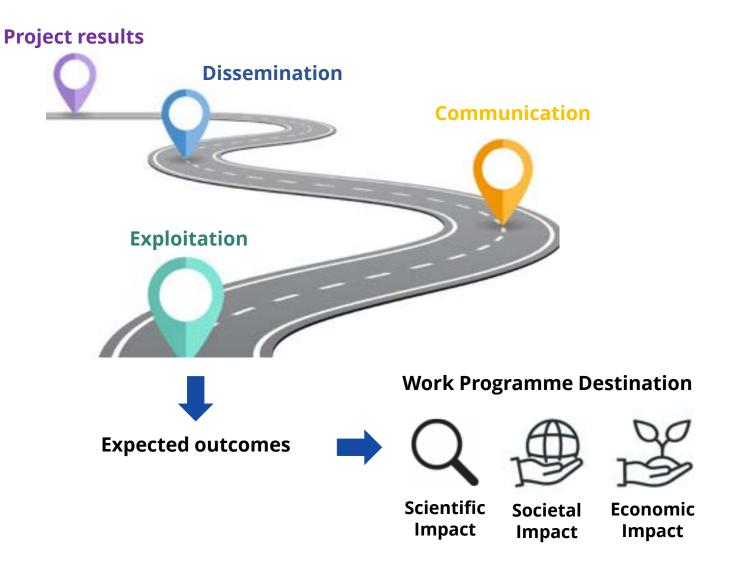

World-class science

Number and shared of peer reviewed FP publications from projects that are core contribution to scientific fields Creation of high-quality new knowledge

Pathways to Impact

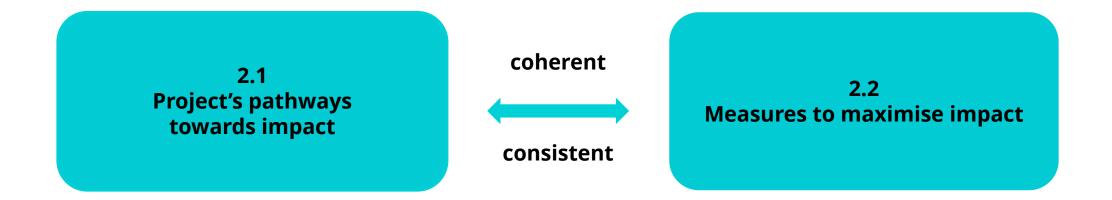

Pathways to impact:

Logical steps towards achieving the **expected impacts** of the project over time, in particular **beyond the duration of a project.** A pathway begins with the projects' results, to their dissemination, exploitation and communication, contributing to the expected outcomes in the WP topic, and ultimately to the wider scientific, economic and societal impacts of the WP destination.

Section 2: IMPACT

- **Section 2.1** describes the **impact logic** for your projects impact pathways
- Section 2.2 describes the practical implementation of how you plan to achieve this impact
- Dissemination, exploitation and communication plans (objectives, target audience and key messages) are derived from the impact pathways
- Ensure information is coherent and consistent across all sections!

Section 2.1: Project pathways towards impact

Standard Application Form (HE RIA and IA)

2.1 Project's pathways towards impact [e.g. 4 pages]

- Provide a narrative explaining how the project's results are expected to make a difference in terms of impact, beyond the immediate scope and duration of the project. The narrative should include the components below, tailored to your project.
 - (a) Describe the unique contribution your project results would make towards (1) the **outcomes** specified in this topic, and (2) the **wider impacts**, in the longer term, specified in the respective destinations in the work programme.

Quantify the short term, medium and long-term impact of your project. Link outputs to the KIPs and relate to EU policy objectives and targets.

Key questions to consider during proposal development:

- What is the <u>value of your project in terms of expected outcomes and wider impacts?</u>
- **How** important and significant are the benefits?
- Why? Identify clear & concise impact goals to justify why your project should be funded
- **Who?** Identify who will benefit from your research stakeholder analysis

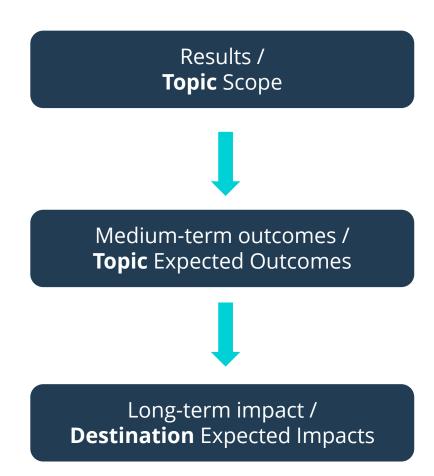

Smart Targets - Project proposal

SMART TARGETS

Are we successful? What will success look like?

Section 2.1: Project pathways towards impact - TIPS

Is your projects contribution to the expected outcomes, and the wider impacts (destination) in the longer term credible?

- Determine & develop the pathways to impact early in the proposal development
 - Always thinking of the added value for Europe
- Have clear and concise links to the expected impacts and outcomes that are defined in the call (provide tables/bullet points etc.,)
- Be as specific as possible in terms of the scientific, societal and economic impact over the short-term, medium term and longer term
 - Linking objectives Expected outcomes and impacts pathways to impact
- Mention all the target groups/stakeholders
 - What type of stakeholders will you need to engage with to achieve the required impact?
 - What actions you need to take to achieve the desired impact?
 - Who are the end-users?

Section 2.1: Project pathways towards impact - TIPS

Scale and significance measures

DO'S

- Include ambitious but realistic scale and significance targets (clearly connected to the expected outcomes and impacts)
- Have a **measure of what success will look like** (add KPI's):
- → Visionary estimations: Jobs, growth, competitiveness
- → **Quantitative indicators** with credible justification
- Baseline, benchmarks and assumptions for these indicators and targets need to be referenced
- Show the evaluators your plans for project sustainability/impact continuity, and project follow-up.

DON'TS

- Lack detail/make generic statements
- Unrealistic targets
- No baseline, or benchmarks for scale and significance

Impact implementation example

	Expected Outcomes	Expected Impact	
Strategic Plan		Seamless, smart, inclusive and sustainable air services through new digital technologies	
Work Programme (Destinations & Topic)	Innovative logistics solutions applied by the EU air transport sector	Seamless, smart, inclusive and sustainable air services	
	Example		
Project Results	Project Outcomes	Project Impact	
Successful large-scale demonstration trial with 3 airports of an advanced forecasting system for proactive airport passenger flow management	At least 9 EU airports adopt the advanced forecasting system that was demonstrated during the project	15% increase of maximum passenger capacity in EU airports, leading to a 28% reduction in infrastructure expansion costs	

Section 2.2: Measures to maximise impact

Standard Application Form (HE RIA and IA)

Section 2.2 Measures to maximise impact (~5 pages)

Describe the **planned measures** to maximise the impact of your project by providing a first version of your 'plan for the dissemination and exploitation including communication activities'.

Describe the dissemination, exploitation and communication measures that are planned, and the target group(s) addressed.

Please remember that this plan is an admissibility condition

- Be specific
- Provide KPIs for activities.

Key questions to consider during proposal development:

- **Why?** Highlight the key objectives from communication
- What? What are the key impact messages we want to deliver?
- When? When is the most powerful time to deliver these messages?
- Where? What channels, platforms and tools are we going to use?
- **Why?** Why is it important to reach the relevant stakeholders? Why do they need to know about this research?
- Are we successful? SMART targets (what will success look like?)

What is Dissemination & Communication

Communicat ion

Identifying and inform stakeholders about the project Raising awareness, preparing for impact

Disseminatio n Targeted sharing of the project results
Support /accelerate Impact and Exploitation

Exploitation

Take action to use project results for commercial purposes, to tackle societal problem or in policymaking

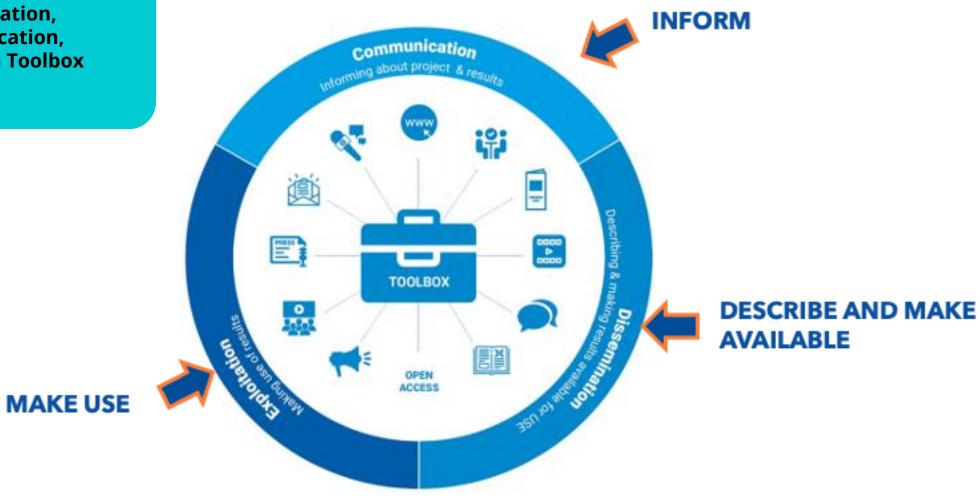

Impact

Communication + Dissemination + Exploitation = Pathways to Impact

What is Dissemination & Communication

Dissemination, Communication, Exploitation Toolbox

Section 2.2: Measures to maximise impact

Outline a strategic communication and dissemination plan:

- Identify clear dissemination and communication objectives
 - Reviewer will check the quality, suitability and concreteness of the proposed measures during and after the project.
- Ensure the scale of your measures are proportionate to the scale and scope of your project
- Preliminary stakeholder map: Identify all the key stakeholders that will utilise your project results beyond the project life
- Be specific identify key activities, channels and platforms
- Preview key messages of your communication and dissemination plan
- Set quantifiable targets (KPIs)
- Ensure you demonstrate your consortiums capacity to successfully execute your impact plan

Quantify what success will look like - use your SMART targets

Section 2.2: Measures to maximise impact

List the main project results/outputs and identify potential exploitation routes:

- Present a market analysis if appropriate (competition, barriers, opportunities etc)
- Present a table with key exploitable results and partners individual exploitation plans
- Address project sustainability/continuity beyond the project life
- Address IPR issues
- Demonstrate your consortiums strengths, expertise and networks that will enable success!

Quantify what success will look like - use your SMART targets

Prioritise key audiences: Be specific!!!!

Example from a recent proposal:

Generic stakeholders:	Specific stakeholder:
Health and social care stakeholders	Health and social care ecosystem : health and social care service providers; nursing homes; caregivers; partners; educators and trainers; healthcare and SSH academics; ethicists; experts involved in relevant EU projects; health agencies and regulatory bodies with interest in developing and testing novel approaches for dementia palliative care.
Policy Makers	European Commission, Government & National regulatory agencies (in particular across the 7 cRTC countries). WHO Action Plan for Alzheimer's Disease & related illness, World Dementia Council, European Ageing Network, Health Europe, Global Dementia Observatory. Government & National regulatory agencies (in particular the 7 cRTC countries).

Example of preliminary stakeholder mapping at proposal stage

WHO National Action Plan for Alzheimer's World Health Organization Journal of Social work **BMC Geriatrics** Disease & Related Illnesses (2017) 2020-2030, World Dementia Council Journal of advanced nursing BMC Palliative Care Global Action Plan on the Public European Commission Health Response to Dementia Journal of Palliative Care Age and Ageing European Ageing Network Palliative Medicine JAMDA 2017-2025 Health Europa The Gerontologist BMJ EAPC: European Social Science and Medicine Association for Palliative Care Person Eurocarers: European Association with Dementia, Working for Carers Families, orld Dementia Council Scientific Public Health Care CONT-END mySupport Study EFFE: European Federation for Family Commission/ Journals CAREGIVERSPRO-MIND myPATH Employment & Home Care **Policy Makers** DEEP Nurse EduPal DISTINCT IMPACT European Ageing Network EMBED-Care PAINLESS In-Touch EU EU EU4Health Pal Cycles Alzheimer's Europe Networks & **EU Navigate PalliativeSedation Projects** Associations EuroCoDe RESPACC European Federation of Neurological Associations IMPACT SHARE-COHESION HOPE: European Hospital & Healthcare Federation INDUCT Alzheimers Disease International EU Government & National Advocacy AECCP: Nurses Association for Long-Term Regulatory and Palliative Care Portugal groups Agencies Ethical ENRICH: Network of Research ready care European Patients' Forum Data homes UK Ministries of Health Legal & European Federation for Family Employment & Home Care Social Sharing HIQA: Health Information ISS: Italian Higher Associations Institute of Health Governance in Ireland European Association of Service Providers for Persons with Disabilities UKON: University Knowledge Network for Older adult care Nijmegen Age Platform EU EUREC: European Network of Polish Association for Helping People with Research Ethics Committees EUREC: European Network of National and European Clinical Programmes Office National Advocacy Groups e.g. Alzheimer's UK, Global Dementia Observatory Research Ethics Committees ASI, Alzheimer's Association Italy Una Europa (Future UniLab Knowledge Hub).

Suitability of your consortium to drive the projects' expected impacts

Key questions to ask when building your consortium

Do we have the resources to reach the relevant target audiences?

• Effective and targeted engagement strategies (communication, dissemination and exploitation)

Do we have the capacity to successfully drive and deliver the planned impact strategy?

- Key Impact Pathways
- Pathways to Impact

Do we have the outreach to successfully exploit the projects outputs and ensure impact continuity?

Funders & Investors

Proposal Evaluation

(Threshold 3/5)

Section 1: Excellence

- 1.1 Objectives & Ambition
- 1.2 Methodology

3/5

Section 2: Impact

- 2.1 Pathways towards Impact
- 1.2 Measures to Maximise Impact
- 2.3 Summary (impact canvas)

3/5

Section 3: Implementation

- 3.1 Work plan & resources (deliverables, risks)
- 3.2 Capacity of the participants & consortium

3/5

Evaluation Criteria

Section 2: Impact

- 2.1 Pathways towards Impact
- 1.2 Measures to Maximise Impact
- 2.3 Summary (impact canvas)

3/5

Evaluation Criteria

- Credibility of the pathways to achieve the expected outcomes and impacts specified in the work programme, and the likely scale and significance of the contributions from to the project.
- Suitability and quality of the measures to maximise expected outcomes and impacts, as set out in the dissemination and exploitation plan, including communication activities

Think as a reviewer:

Use the self- evaluation forms

Seek external reviews:

Colleagues

Consultant

NCPs

The projects innovation must serve the needs of the EC in terms of policy and objectives. The projects outputs must be aligned with the requirements of the topic/WP/destinations.

Crowdhelix as a Impact Partner

Preparation of Impact Section 2.2

Stakeholder mapping

Dissemination, Exploitation Communication plan

Dissemination and Communication activities: logo, website, social media, videos ...

Exploitation and IPR management: linking project results with end-users

Helix engine: virtual ecosystem

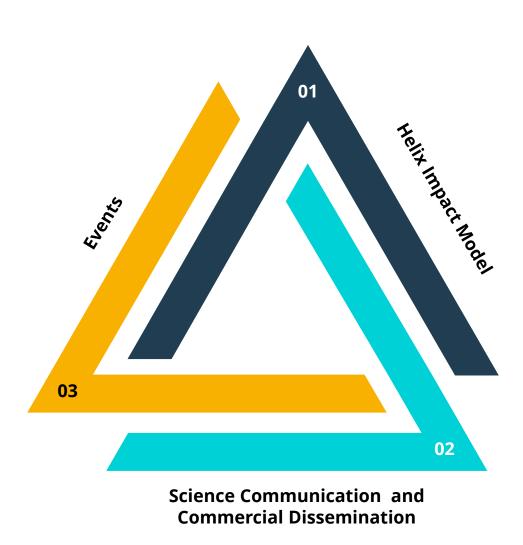

Knowledge sharing and Impact Events

Clustering with EU projects/networks

Impact Analysis

Impact Acceleration Approach

01 Helix Impact Model

Stakeholder analysis, Matchmaking and clustering, profiling and connecting innovation to global endusers using recommender engine

O2 Science Communication and Commercial Dissemination

Social media, website, videos, open webinars, newsletters, tech update announcements, public relations, events

03 Events

Knowledge sharing and impact events

Helix Impact Model Roadmap

Phase 2 - Engagement

Strengthen and expand the network and the participation of stakeholders in the helix community (along the project value chain):

- 1. Science and innovation communications
- 2. Events (Internal and External)
- 3. Clustering Activities
- 4. Funding opportunities
- 5. Planning the audience engagement.
- 6. Results identification and dissemination (KERs)

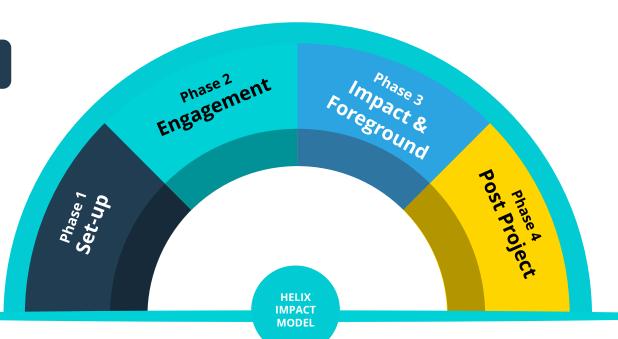

Phase 3 - Impact and Foreground

Facilitate Impact and Foreground

- 1. 2nd Helix Event to promote project's outputs
- 2. Technology Transfer and Commercialization (Collaborate for scale)
- 3. Seek Funding for further development
- 4. Policy Advocacy
- 5. Training and Capacity Building
- 6. Results dissemination (KERs)

Phase 1 - Set-up

- 1. Set-up of the Helix and onboarding partners
- 2. Setting up the targeted stakeholders' map and value chain
- 3. Stakeholder engagement strategy
- 4. Connect with sister projects
- 5. Official Launch of the Helix 1st Helix Event

Phase 4 - Post Project

- 1. Helix Sponsors/Leaders
- Outgoing interaction in the Helix to stimulate new proposals and funding opportunities
- 3. Stimulate new scientific debate based on the follow-up of the project
- 4. Attract the attention of policymakers and investors
- 5. Results dissemination (KERs)

Benefits of the Helix Impact Model

Accelerated progress

Leverage insights and resources to expedite the development of your projects

Facilitated Collaboration

A streamlined collaboration process, members connect and partner with experts and organisations for mutual benefit

Expert Guidance and Support

Support from experienced professionals to navigate challenges and optimise outcomes

Project Impact

The platform increases project visibility, enabling a deep reach of potential collaborators, partners and funders

Global reach

Focused on impact and collaboration requirements. Accessing public and private funding and investment

Increased Funding Opportunities

For potential funders, investors and sponsors
